DETAILED ACTION

Allowable Subject Matter

1. Claims 1-18 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. **As per claim 1 and dependent claims 2-6 and 15-17**, the examiner found no reference in the prior art that disclosed or made obvious an X-ray tube comprising an anode and cathode; the cathode being substantially transparent to X-ray radiation; wherein the X-ray tube is constructed with the anode being a hollow cylinder and the cathode being a coaxial cathode hollow cylinder positioned inside the anode; the anode constructed to emit X-ray radiation in a direction opposite to the direction of emitted electrons from the cathode back to and through the cathode to a target area situated within the confines of the cathode and including all limitations recited in independent claim 1.
4. **As per claim 7 and dependent claims 8-12**, the examiner found no reference in the prior art that disclosed or made obvious a method wherein the anode is an anode hollow cylinder with a coaxial cathode hollow cylinder inside to direct X-ray radiation back to and through the cathode to a target area within the confines of the cathode and including all limitations recited in independent claim 7.
5. **As per claim 13 and dependent claim 14**, the examiner found no reference in the prior art that disclosed or made obvious a method wherein the

Art Unit: 2882

X-ray tube is constructed as an anode hollow cylinder with a coaxial cathode cylinder inside that is substantially transparent to X-ray radiation to allow X-ray radiation to pass there through to a target area within the confines of the cathode and including all limitations recited in independent claim 13.

6. **As per claim 18**, the examiner found no reference in the prior art that disclosed or made obvious an X-ray tube comprising: a cathode comprising a substrate and a thin layer of an electron emitting material such that the cathode is substantially transparent to X-ray radiation, the cathode being shape to emit electron emissions over a wide angle and an anode being similarly shaped as the cathode to emit X-rays back to and through the cathode and to a target area situated to the other side of the cathode from the anode over the wide angle and including all limitations recited in independent claim 18.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
